

I'm a very satisfied customer of XM Radio. I live in the greater Houston area and XM's wide range of material makes my commute to Houston much more enjoyable. I rely on the XM Instant Traffic and Weather to get quick, accurate updates on Houston traffic as I negotiate the Houston traffic.

I've found the XM Instant Traffic and Weather to be timely and accurate. Local radion stations in Houston provide traffice updates at best every six minutes. XM Instant Traffic is on continously, which means I'm never waiting to hear an update.

Don't limit XM's range of offerings (including XM Instant Traffic & Weather) unless you have a better solution than local traffic updates every six minutes. That's not good enough for me.
